REASONS FOR ALLOWANCE

Claims 1, 5-13, 17-21, 23-27, 29, 30, and 32-37 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

The subject matter of the independent claims could either not be found or was not suggested in the prior art of record. The subject matter not found was the combination of a capacitive sensor and a barrier pad both held by a sensor holder for positioning against a needle to detect when the needle is dislodged from a patient, where the sensor itself does not contact any blood directly but rather the sensor is configured to detect wetness in the barrier pad, said pad being the means to absorb any blood that has leaked from the patient, in combination with the other elements (or steps) in the claims. The capacitive sensor may be an electrode, plural electrodes, or an electrode array. In one claimed embodiment a controller is part of the system to process the signal and prevent further blood flow through the needle to control or stop any further blood loss. The prior art of record does not teach detection of needle extravasation without the sensor directly contacting the blood as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
